Are your  
batteries  
getting  
the **VIB**  
treatment?

**JUICE**  
THE ART OF ENERGY

# Protect your workforce and save money with our Very Important Battery (VIB) Plan

The cost-effective, hassle-free solution that covers all your warehouse battery maintenance needs.

## What is a VIB Plan?

Our VIB Plan is a bespoke battery maintenance package, tailored around you and your material handling needs. It's designed to take the hassle and stress out of the responsibility of battery care and covers a wide range of machinery within the distribution environment, from forklifts and cherry pickers to cleaning machines and low-lift pallet trucks – we take care of it all.

## Why choose it?

It provides peace of mind and cost savings. Because the plan covers every aspect of battery maintenance, from all health and safety issues to scheduled battery topping services and personal protection kits, you'll be safe in the knowledge that your workforce is protected, and because all this is provided from one supplier, you'll enjoy the cost savings too.

Don't delay – call our team on **01623 863880** and give your batteries the VIB treatment.

## Some of the benefits

- 'Plug-and-Play' use of truck; all battery maintenance responsibilities removed
- Cost-neutral for whole package vs in-house cost of topping only
- We take care of all health and safety issues relating to battery acid and gasses
- Improved safety: Our qualified service engineers will highlight and advise on any potential issues
- No need to supply/purchase deionized water
- Cloud-based asset register enables fast response for parts and advanced care requirements
- Free guidance provided to operatives on the safe use of charging equipment and stowage of cables
- Provided by a name you can trust – with over 25 years' experience in the industrial battery sector
